

## Polymarine

Make the Case - East Asia Finals Team

### Timmy Ann Kristine Chen

Timmy Ann Kristine Chen is a sophomore taking up BS in Management Information Systems at Ateneo De Manila University from the Philippines. Her interests include utilizing technology for a more effective and efficient system. She would like to work someday as a solutions architect who integrates and programs software systems to ensure that specific business needs are solved. She is interested in an internship and part-time work for future career opportunities.

### Janella Chua

Janella Chua is a sophomore taking up BS in Environmental Science in Ateneo De Manila University from the Philippines. Her interests include sustainable development goals (SDGs), educational and societal inclusivity, environmental sustainability, wildlife conservation and protection for indigenous tribes, and climate justice. She would like to work someday as an environmental consultant that reviews and assesses environmental impact statements. She is interested in an internship so that she may have enough experience for future career opportunities that await her.

### Giolo Roberto Lopez

Giolo Lopez is a sophomore taking up BS in Management Information Systems at Ateneo De Manila University from the Philippines. He would like to work someday as a management consultant that reviews and assesses business statements. He is interested in an internship so that he may have enough experience for future career opportunities that await him and prepare him to enter the workforce upon graduation.

### Hanz Khalil Gollon

Hanz Khalil Gollon is a sophomore taking up BS in Psychology in De La Salle University from the Philippines. He has a vested interest in sustainable development in my country. He also would want to someday be a psychologist or psychometrician aiding his fellow countrymen and their lives. If given the opportunity, he would take up an internship to get a feel for his field's requirements as well as a way to learn what challenges he will face when he starts his career.

# PLASTIC FISCHER

Plastic Fischer's Triple L Initiative can attack the problem of plastic waste in the Citarum River, one of the most polluted rivers in the world, swiftly, at scale, and with the involvement of local communities through the use of local, low-cost, and low-tech solutions.

They invented the TrashBoom, a quick and simple way to halt floating debris in waterways on the spot. It is ideal for large regions with slow flow rates and it self-aligns and adjusts to the water level.

Moreover, the initiative can be swiftly reproduced, repaired, and developed in emerging areas in East Asia.
