Make the Case - East Asia Finals Team

Team Rosas

University: Ateneo de Manila University (Philippines)

About the Team

We are a team of students taking Master of Science in Sustainability Management (MSSM) who are also professionals with diverse backgrounds who share the same passion for making the world a better place one less plastic at a time.

	<p>Ellysha Kristen S. Felizarta Team Leader https://www.linkedin.com/in/ellyfelizarta/</p> <p>While working for a startup in the agriculture and rural development industry in the Philippines as the Head of Business Development, I am also a student at the Ateneo de Manila University taking up MS in Sustainability Management. Being a working student has opened my eyes to the need for implementing realistic and impactful sustainability initiatives in both the private and public sectors. This has also sparked my passion for integrating a circular economy into businesses of diverse industries. Moving forward, I want to pursue a career in consulting within the sustainability space and eventually manage my own consulting firm.</p>
	<p>Adrian H. Romero Team Member https://www.linkedin.com/in/adrian-romero-969033181/</p> <p>As the CEO & President of Excefil Corp. (sales & marketing arm of Alphatec Chemical Corporation) and Managing Director of HydroFrequency Int'l Corp. (the official exclusive distributor of Ecospec Philippine products in Metro Manila, Cebu, and South Korea), I am also a student in the Ateneo de Manila University taking up MS in Sustainability Management. As I work and study, I wanna know how to grow businesses for the betterment of society and for further expansions.</p>
	<p>Mark Louie C. Contreras Team Member https://www.linkedin.com/in/louie-contreras-84393492/</p> <p>While working as a Senior Manager in the Advisory Services of an accounting and auditing firm heading Process and Quality Management, I am also a student in the Ateneo de Manila University taking up MS in Sustainability Management. My work is mostly on advisory and consulting for governance, risks, controls, and project management. Prospectively, I want to focus on sustainability initiatives and for a positive people, planet and profit.</p>
