Implementation: The first special line for the removal and transportation of polluted and disposable plastic in Zhejiang Province, China

Purpose: Collect the wasted plastic, provide guarantee for the promotion of garbage classification in the whole region and improve people's awareness

Team Members

Jingting Lu (China)

I am a year4 undergraduate student, major in heritage management.

I enjoy trying something new and challenging since the world is changing and always surprising me. I couldn't turn down an opportunity in any other field which will allow me to learn more, especially in the environmental field that can make our lives better!!

Keyue Wang (China)

A year 4 student from Macao Institute for Tourism Studies majoring in heritage Management.

I am deeply aware of the profound impact of the environment on heritage. The environment we live in needs our protection. Only by protecting the environment can we better protect ourselves and everything we have created, including heritage.

Runnan Luo (China)

Senior Heritage Management student at Macao Institute for Tourism Studies, current intern at ICOMOS China, treasury of school's Volunteer Circle. Interested in sustainable tourism and inclusive urban development. Green lifestyle advocator, cycling is my way to explore the surroundings. Always curious and would like to deep down research dialectically.
